

SKECHT™

The Art of Nano-Brows & Microblading

By Principal Artist Kat | IBoutique, Bulimba

About SKECHT™

SKECHT™ is Principal Artist Kat's refined brow methodology at IBoutique, Bulimba — designed to create soft, natural, hair-like definition tailored to each client's face, skin type and lifestyle.

Combining advanced nano-brow techniques that she studied with Russia's nano-master with classic microblading artistry, SKECHT™ delivers elevated, long-lasting results while prioritising skin integrity and precision.

What Are Nano-Brows?

Nano-brows are a cosmetic tattoo technique performed using a digital machine with an ultra-fine needle to create delicate, hair-like strokes.

Unlike manual methods, the machine allows for greater control in depth, pressure and pigment placement — resulting in:

- Crisp, ultra-fine strokes
- Less trauma to the skin
- Suitable for a wider range of skin types
- Longer-lasting definition
- Softer healing results

Nano-brows are particularly beneficial for:

- Oily or combination skin
- Mature skin
- Clients who have had previous brow work
- Those wanting a more seamless, airy finish

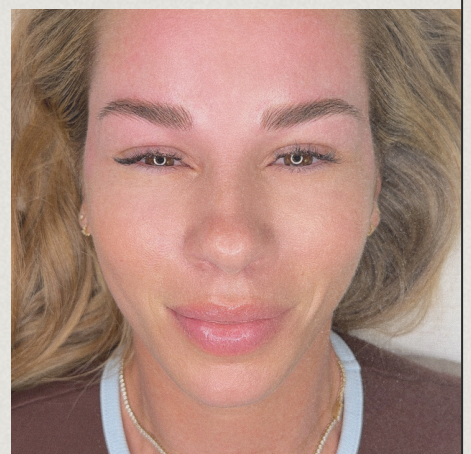

What Is Microblading?

Microblading is a manual technique using a fine blade to create realistic hair strokes by implanting pigment into the skin.

It remains a beautiful and effective method for:

- Dry to normal skin types
- Clients wanting very defined hair strokes
- First-time cosmetic tattoo clients

Microblading offers a handcrafted artistry that many clients love for its traditional, precise finish.

The Difference with SKECHT™

SKECHT™ is not about replacing microblading — it's about refining and evolving brow artistry.

Key Differences in the SKECHT™ Approach:

1. Precision Technology

Nano-brows use a digital machine for controlled pigment placement, allowing Kat to customise depth and stroke softness.

2. Skin-Conscious Technique

The nano method can be gentler on the skin, which may support improved longevity and smoother fading over time.

3. Bespoke Mapping & Design

Every SKECHT™ brow begins with advanced facial mapping to enhance bone structure, symmetry and natural growth patterns.

4. Soft Luxury Finish

The goal is effortless elegance — brows that look naturally fuller, not overworked.

Benefits of SKECHT™ Nano-Brows

- ✓ Hyper-realistic hair strokes
- ✓ Suitable for most skin types
- ✓ Longer pigment retention
- ✓ Minimal scarring risk when properly maintained
- ✓ Softer, more natural fade
- ✓ Ideal for all climates especially —Brisbane's humid climate

Benefits of Microblading

- ✓ Defined hair-stroke artistry
- ✓ Beautiful for dry skin types
- ✓ Traditional handcrafted technique
- ✓ Creates structured brow enhancement

SKECHT™

Why Choose Principal Artist Kat?

At IBoutique, Bulimba, Kat brings advanced technique, aesthetic precision and a luxury client experience to every appointment.

Her SKECHT™ method is designed to:

- Enhance natural beauty
- Create balance and proportion
- Deliver long-term brow confidence
- Maintain skin health and integrity

Every brow is tailored — no templates, no shortcuts.

Who Is SKECHT™ For?

- Those seeking refined, low-maintenance brows
- Busy professionals
- Alopecia or those suffering from medical hair loss
- Clients desiring subtle, natural enhancement
- Those correcting previous brow work

SKECHT™

The SKECHT™ Philosophy

Brows should frame the face — not overpower it.
They should soften, lift and define — while still looking like you.

Luxury is in the detail. Sketch your dream brows .
